Summary

I am a graduate of the D4 Informatics Engineering program with an educational background and experience in backend development, network management, and security system installation. Skilled in configuring Mikrotik networks, managing servers, and developing websites. Able to work well in a team, adapt quickly, and committed to delivering high quality results.

Experience

Internship at Kominfo (Department of Communication and Information) of Malang Regency

August 2024 - December 2024

- Assisted in creating and developing the official website of the Malang Regency Government for SPBE services (https://spbe.malangkab.go.id/).
- This website is used by the public to access information and public services online.

Internship at PT. Mangli Djaya Raya

August 2022 - December 2022

- Configured and managed the company's internet network using Mikrotik devices.
- Set up and maintained the company's internal email server using Debian Server.
- Converted a Raspberry Pi into a cloud storage system using OwnCloud.
- Handled troubleshooting for computers, printers, and CCTV systems.

Projects

PT. Mangli Djaya Raya
Network Division

August 2022 - December 2022

- Managed a monitoring system for warehouse temperature and humidity to maintain tobacco storage quality.
- Configured the company's network to ensure safety and stability, including internet traffic management (bandwidth), firewall security, hotspot, and VPN for remote access
